**Subject:** This concerns the issue of your safety

Hi, dear user of

I'm sorry for my english, I'm from East Europe.

We are installed one RAT software into you device.

On this moment you email account is hacked (see for <from address>, now I have access to you accounts).

I dowload all confidential information from your system and I had some more evidence.

The most intersting moment that I have - it's videos record as your masturbation.

I posted my virus on porn site, and then you installed it on your Operation System. When you clicked play button on porn video, at that moment my trojan was downloaded to your device.

After installation, your front camera shoots video every time you masturbate, in addition, the software is synchronized with the video you choose.

At the moment the software has collected all your contact information of social networks and email addresses.

If you need to erase all of your collected data, send me \$250 in BTC (crypto currency)

This is my Bitcoin wallet:

You have 2 days after reading this letter.

After you transaction I will erase all you data.

Differently I will send video with your pranks to all your colleagues and friends!!!

And Henceforth be more careful!

Please visit only secure sites!

Bye!
