

Is your  
business losing  
productivity  
from a lack  
of email  
reliance?

**D**o you want the latest and safest email platform with seamless access to emails, calendars and contacts? Do you need your emails always available across all your devices, especially during a business disaster? Do you want to reduce your exposure and risk to email spoofing, lost emails and email downtime?

**Our hosted email solution uses the latest Microsoft Exchange where company emails, calendars, contacts and tasks are shared and accessible securely, on demand through Microsoft Outlook (for Windows and Macs), Outlook Web Access via an internet browser and on your mobile devices.**

With a guaranteed network uptime service level agreement and synchronised mobile access, your emails will always be available across all devices. Together with backups stored regularly for instant email recovery should disaster strike, meeting Disaster Recovery and Business Continuity procedures as well.

Hosted exchange email also enables you to invest in an email security solution that protects your organisation from threats (such as email spoofing) even before they reach your internal network. With the added benefit of email filtering "in the cloud",

your network and emails are ring-fenced for total protection against 98% of spam and 100% of known viruses without the hassle of managing additional hardware or software.

Share a Mortgage, a shared ownership membership platform had a common business problem where they had multiple email addresses with an unsatisfactory email hosting provider. The company thrives on being able to send and receive emails without bottlenecks from anywhere across any device and with the knowledge and assurance that their email is always available and recoverable.

Amazing Support migrated the company's mailboxes, emails, calendars and contacts away from their previous email hosting provider to a secure hosted exchange enterprise platform. Our objective was to take all of that worry away from them and without any downtime or business interruption. We even setup their email profiles on their computers and devices before their next business operating day.

“Amazing Support has just migrated our emails onto a hosted exchange server to combat the issues we were having over emails not being received. One lost email can cost our business £1,000s. The service I have received has been excellent and I cannot recommend them enough.”

**Andy, Share a Mortgage**

## We'd love to hear from you

If you're at the point where you need to bring your email system up-to-date, require better control and security and would like to commercially benefit from increased email speeds, business continuity and transparent scalability, then Get In Touch on **0203 728 2555** and we'll go through our hosted email with you.
