

## Business investment and commercial growth opportunities in the UK made possible with support from technology partners

**As part of the inward investment initiative of the UK Government and working in conjunction with the UK Trade & Investment (UKTI), companies not located in the UK are considering expanding their business operations and opportunities overseas.**

Companies are choosing to expand or move their business to the UK and are doing so because it's an ideal location. London is especially seen as one of the global hub locations for start-up, enterprising and expanding businesses across multi-sector industries.

The UK has people with talent, the right skills, a simple and competitive tax rate system and a transparent regulatory system making it easier to do business than ever before.

**Smartmatic**, the undisputed leader in the electronic voting industry help hundreds of millions of voters cast billions of ballots in thousands of government elections around the world through their electronic voting systems and technology that has now become a worldwide standard.

The company chose London for their UK headquarters and employed Amazing Support to support them through weekly on-site visits ensuring hardware, software, internal and

external connecting IT services were always operational as well as providing staff, managers and executive officers with immediate user and device support, together with change request management. In addition to the remote back-office support team enabling extended IT support options, procurement assistance and consultancy, the full array of IT services provided by Amazing Support safeguarded the business in maintaining their unique hold on the EMEA market and continuity of their commercial operations.

“ We were looking for outsourced IT support for our headquarters in London. Amazing Support provide a weekly on-site support service as well as remote support when needed. The London office is where our CEO, CFO and multiple executives are based and I needed to ensure as near to 100% uptime of our infrastructure, laptops, phone system and day-to-day user support. ”

**Jay, Smartmatic**

## We'd love to hear from you
